

Cutover:

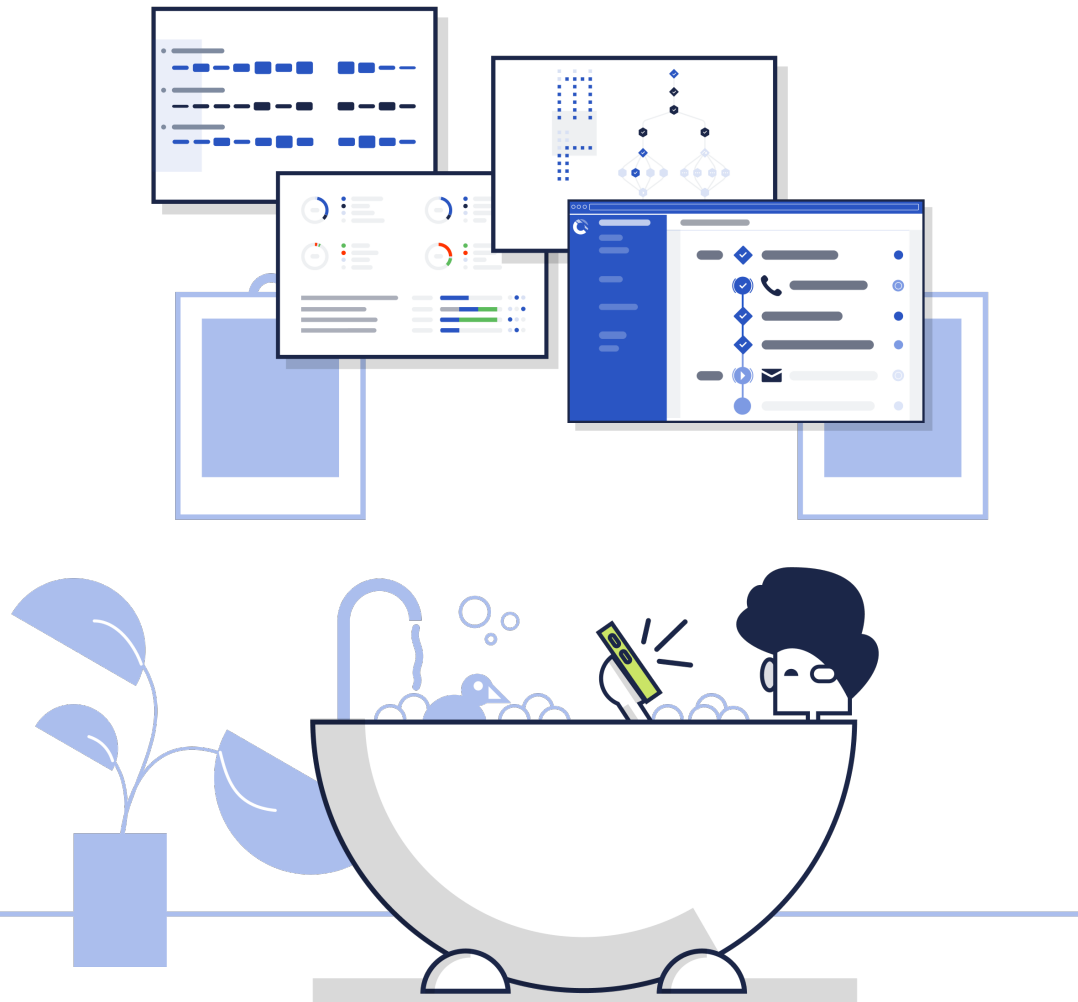

Work Orchestration
and Observability

cutover

Cutover enables organizations to orchestrate work across teams and technologies in dynamic, automated runbooks with real-time visibility and control.

On average, Cutover enables our customers to:

- Reduce event planning time by 50%, saving \$643,000 due to recaptured productivity over three years - Directors of Production Management, Cutover customers
- Reduce event execution time by 50%, saving \$6.8 million over three years - Heads of Technology Resiliency, Cutover clients
- Mitigate incidents, saving \$1.3 million over three years - Implementation and Live Proving Leads, Cutover customers
- Easily find problem areas and continuously improve
- Act faster with confidence
- Ensure regulatory compliance
- Increase productivity by freeing up your people from manual, repeatable tasks
- Help infrastructure change and consolidation initiatives

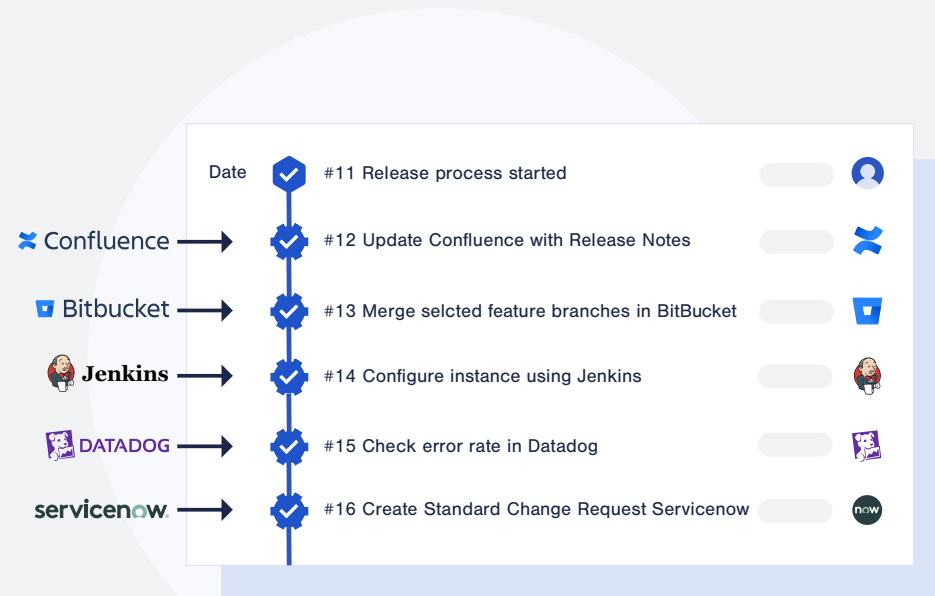

Features

Automation runbooks

detail all activities planned for an event, both chronologically and by mapping the relationships, dependencies, and critical paths.

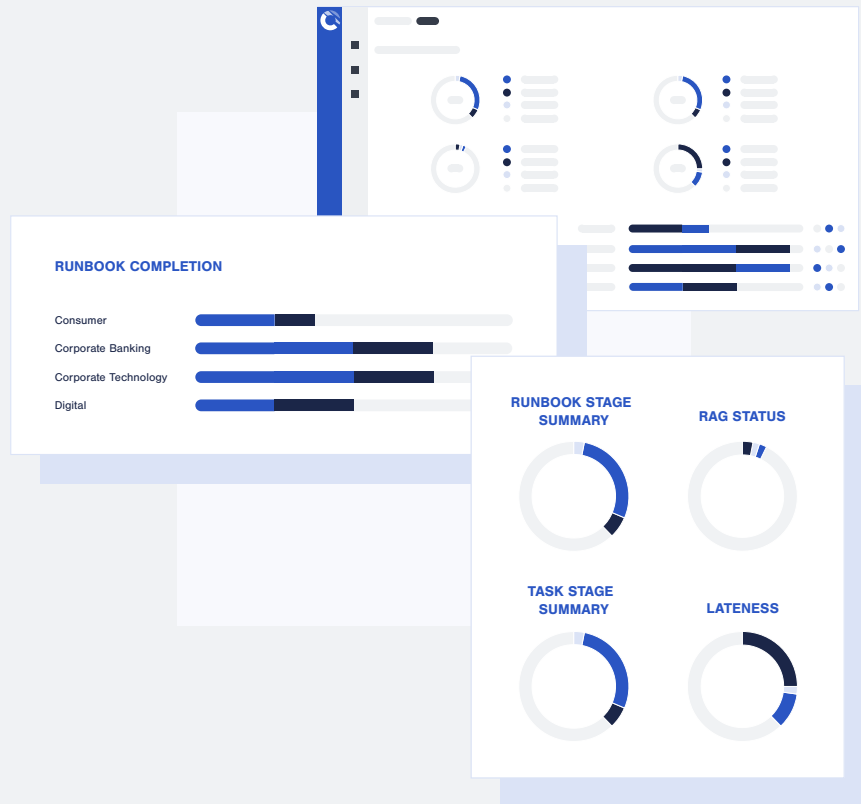

Live visualization

helps you successfully coordinate, optimize, and de-risk your upcoming work.

Intuitive dashboards

provide live visibility of all runbooks, making it easy to share progress with team members and stakeholders.

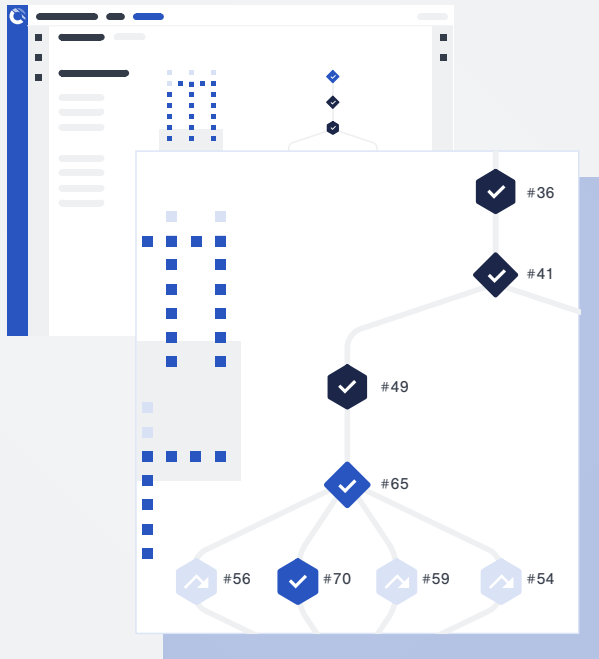

Advanced analytics

give you the data you need to continuously improve your processes while managing risk and meeting regulatory requirements.

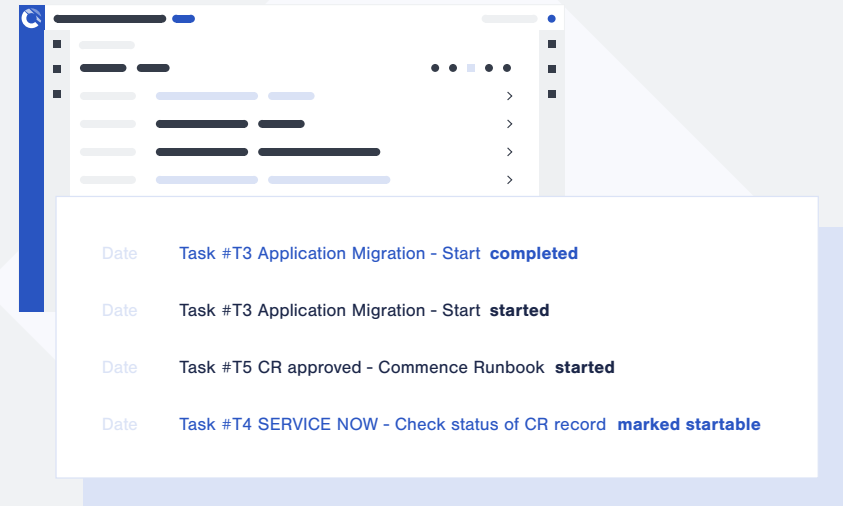

Node maps

help you identify parallel tasks and dependencies, manage the critical path, and stay on schedule.

The indelible audit trail

automatically records events and activities, facilitating in-depth analysis and improvement.

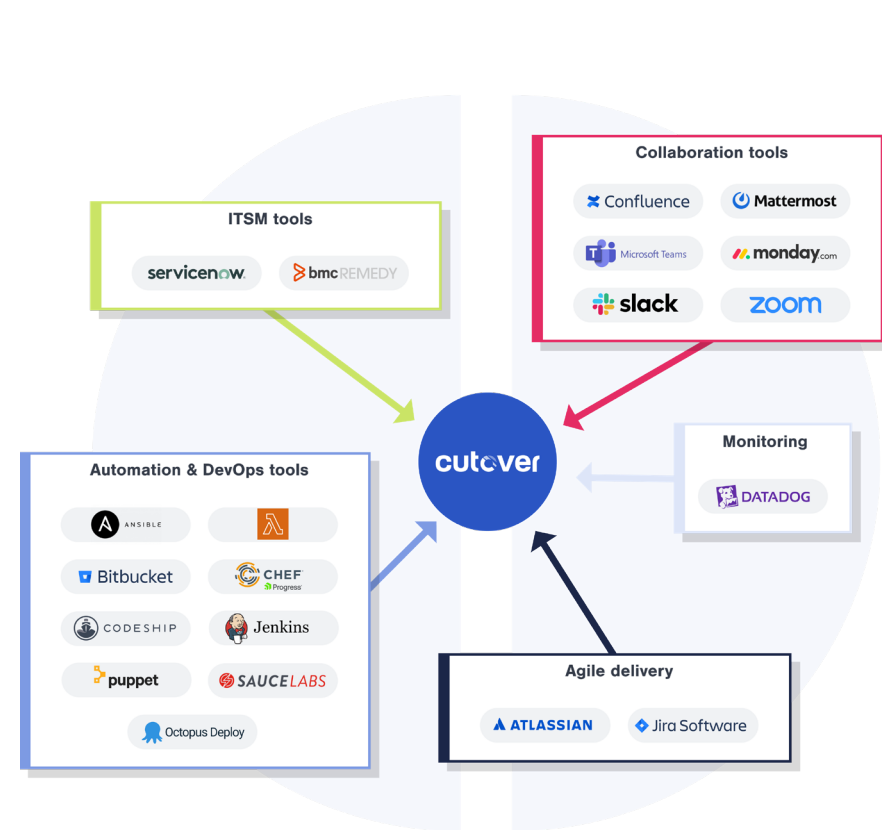

Communications made easy

including text messages, Slack, Microsoft Teams, email, and video conferencing.

Seamless integrations

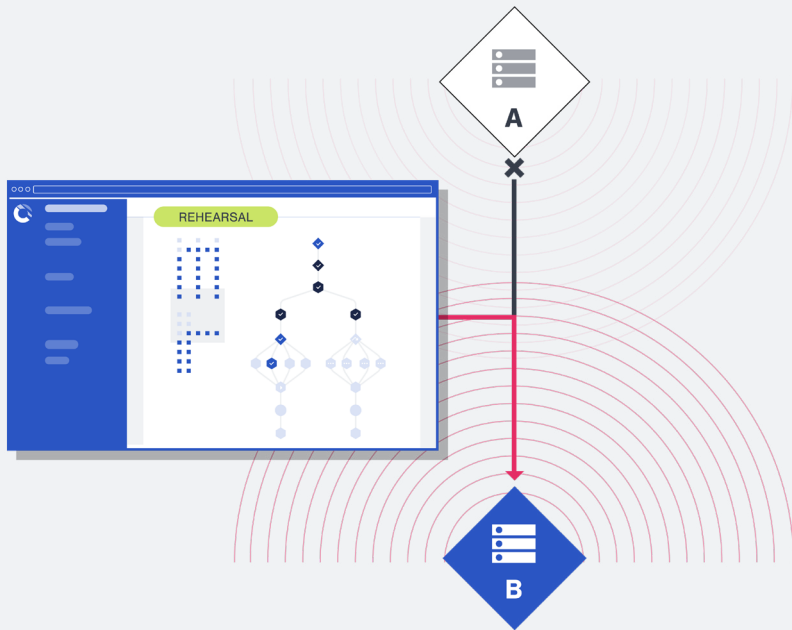

with IT service management, DevOps tools, collaboration tools, and more.

Use Cutover for:

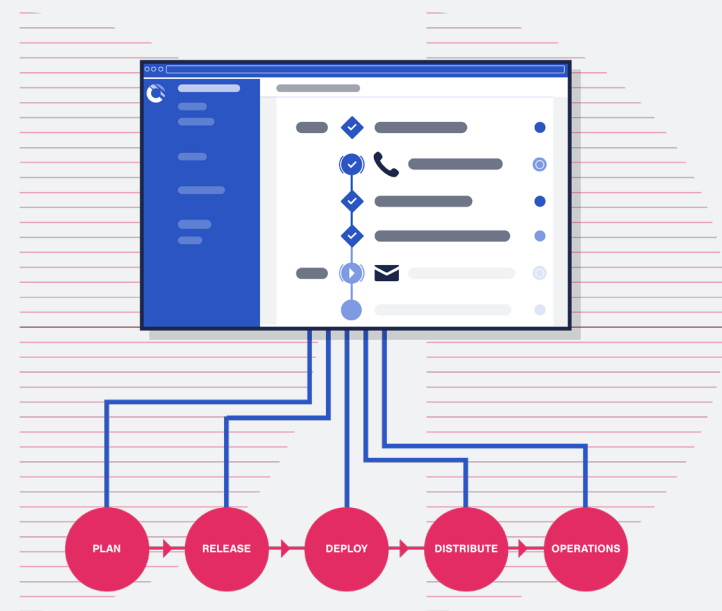

Operational Resilience

Run service/application resilience testing and invocation, production failovers, and other repetitive events, ensuring swift recovery and compliance with internal regulators.

Application Release Orchestration

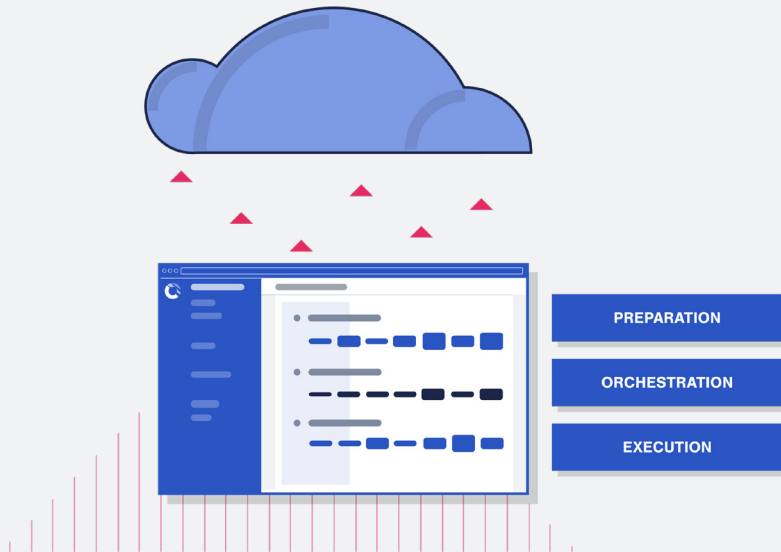

Drive continuous improvement with the efficient management of regular application releases and ongoing technology-led changes, with cross-functional visibility and engagement built in.

Use Cutover for:

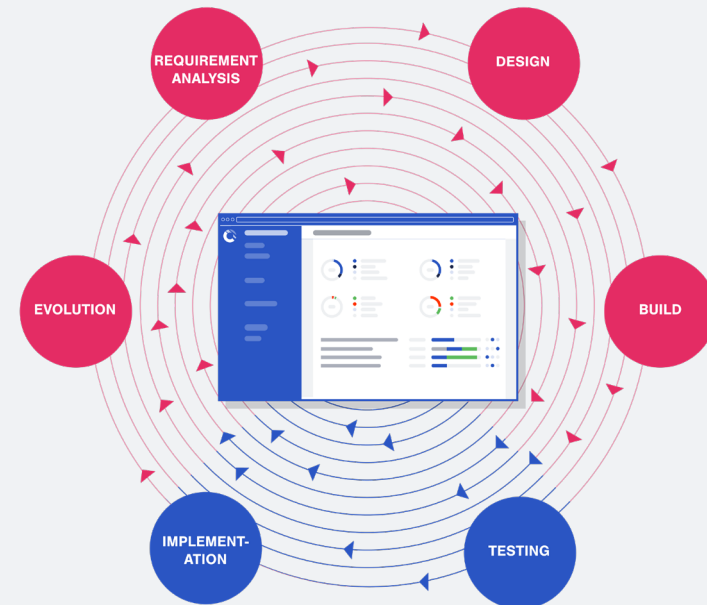

Cloud Migration

Accelerate your journey to the cloud and maximize value with greater control, full observability, and less risk.

Platform Implementation

Seamlessly introduce, upgrade, and maintain your platforms, software, and technology with Cutover.

Our Partners

Cutover helps some of the world's largest, most complex firms to navigate a change-driven economy, both directly and in collaboration with our partner organizations such as AWS, Deloitte, ServiceNow, Accenture, Slack, Twilio, and CS Technology.
